Baba Vanga's predictions for 2023:

Baba Vanga was born in Macedonia on the 3rd of October 1911 and died in Bulgaria on the 11th of August 1996. It is believed she was injured after a tornado hit her village when she was just 12, throwing her into the air and flinging dust into her eyes. Following the alleged event, she slowly went blind and began experiencing visions. She is known for making predictions for what will happen in the future. For example she predicted 9/11, the Chernobyl nuclear catastrophe, the rise of Barack Obama and Donald Trump and even her own death. But she also forecasted many things that didn't come true, such as World War that was supposed to start in November 2010 and end in October 2014 and that Europe would be almost deserted in 2016.

Bioweapon tests

According to Baba Vanga's 2023 forecasts, a major nation would allegedly conduct bioweapons testing. To be clear, none of these predictions have been verified.

Change in Earth's orbit

The orbit of Earth is said to be changing in 2023, according to another popular prophecy, and a global nuclear disaster might be the cause of this enormous shift.

Solar storm

She also thinks that we will experience a solar storm with destructive consequences equivalent to those of billions of nuclear bombs. This may lead to power outages and disruptions in communication.

Creation of lab babies

Baba Vanga predicted the rise of lab children. This suggests that parents may have the option to change their children's physical characteristics, such as hair and eye color, before they are born. It remains to be seen if any of her predictions will come true in the new year.

Chinese New Year 2023

The date of Chinese New Year changes every year, but it always falls between January 21st and February 20th and every year starts with a new moon day, usually the second after the winter solstice.
